

TRAVEL & TOURISM **ECONOMIC** **IMPACT 2025**

BRAZIL

FORWARD

Travel & Tourism, as one of the world's largest economic sectors, is a key driver of exports and generator of global jobs and prosperity. So, it is wonderful to see that in 2024, demand for Travel & Tourism was stronger than it has ever been. The sector's GDP contribution grew 8.5% to reach \$10.9 trillion, surpassing 2019 levels by 6%. Travel providers created 20.7 million new jobs, bringing the total to 357 million worldwide. International travellers continued shopping, exploring, and dining out, spending 11.6% more than the previous year, albeit still 1.3% below the pre-pandemic spending peak.

Every region saw a return to pre-pandemic levels of tourism activity. But the pace of growth varied. The Caribbean, where travel represents the largest share of the economy, experienced the fastest growth between 2019 and 2024, up 28.3% on its former peak. The Middle East continued to consolidate its recovery, with tourism's GDP up 16.1% since 2019. The Asia-Pacific region was the slowest to recover, largely due to weaker-than-anticipated growth in China.

In 2025, we expect this positive momentum to continue. The sector is transitioning from a state of recovery to a steadier state of growth. By the end of the year, we forecast that Travel & Tourism will support 14.4 million new jobs, while the sector's contribution to the global economy will have grown by approximately 6.7%. We also predict a record-breaking moment later this year, when international visitor spending is set to rise by 10% compared with 2024, surpassing its previous 2019 peak by 8.6%.

There are challenges, however. The world is at an uncertain moment in history. Geopolitical tensions are rising. The threat of a full-scale tariff war looms. If this happens, few businesses will be unaffected; most will face higher costs, with a ripple effect across the tourism supply chain. If prices go up, inflation will put renewed pressure on consumer spending and may dampen demand.

There is, too, the ongoing threat of climate change and biodiversity loss. In 2023, global tourism accounted for around 6.5% of the world's greenhouse gas emissions, underscoring the critical need for continued sustainable innovation as Travel & Tourism expands. Coastal and marine destinations are the most vulnerable. At the World Travel & Tourism Council, we have always pushed for growth that is sustainable, in every sense. If we cannot preserve our most prized destinations, we cannot operate. Working with our members, we have developed projects over the years to catalyse and encourage sustainability-focussed action, from sharing data on our sector's environmental and social footprint to industry-led certifications like the Hotel Sustainability Basics.

Travel & Tourism continues to be resilient, however the sector needs to continue to stay ahead of the curve on key existential issues such as the future of the workforce, and the adoption of emerging technologies such as artificial intelligence to help the sector become more efficient, seamless and sustainable. WTTC will be addressing these issues and providing guidance and recommendations.

This report contains crucial data on the current state of the Travel & Tourism sector. For policymakers, it's a valuable benchmarking tool when planning effective strategies to support the sustainable growth of travel. For industry leaders, it provides hard evidence that can be used when weighing up investment opportunities in different parts of the world. And for researchers, this data is a rich academic resource to further the world's understanding of our sector and its future outlook.

Partners:

DEFINING THE ECONOMIC CONTRIBUTION OF TRAVEL & TOURISM

Travel & Tourism is an important economic activity in most economies around the world. As well as its direct economic impact, the sector has significant indirect and induced impacts. The UN Statistics Division-approved Tourism Satellite Accounting methodology (TSA:RMF 2008) quantifies only the direct contribution of Travel & Tourism. But WTTC recognises that Travel & Tourism's total contribution is much greater, and aims to capture its indirect and induced impacts through its annual research.

DIRECT CONTRIBUTION

The direct contribution of Travel & Tourism to GDP reflects the 'internal' spending on Travel & Tourism (total spending within a particular economy on Travel & Tourism by residents and non-residents for business and leisure purposes) as well as government 'individual' spending - spending by government on Travel & Tourism services directly linked to visitors, such as cultural (eg museums) or recreational (eg national parks).

The direct contribution of Travel & Tourism to GDP is calculated to be consistent with the output, as expressed in National Accounting, of tourism-characteristic industries such as hotels, airlines, airports, travel agents and leisure and recreation services that deal directly with tourists. The direct contribution of Travel & Tourism to GDP is calculated from total internal spending by 'netting out' the purchases made by the different tourism industries. This measure is consistent with the definition of Tourism GDP, specified in the 2008 Tourism Satellite Account: Recommended Methodological Framework (TSA: RMF 2008).

The total contribution of Travel & Tourism includes its 'wider impacts' (ie the indirect and induced impacts) on the economy. The 'indirect' contribution includes the GDP and jobs supported by:

- Travel & Tourism investment spending – an important aspect of both current and future activity that includes investment activity such as the purchase of new aircraft and construction of new hotels;
- Government 'collective' spending, which helps Travel & Tourism activity in many different ways as it is made on behalf of the 'community at large' – eg tourism marketing and promotion, aviation, administration, security services, resort area security services, resort area sanitation services, etc;
- Domestic purchases of goods and services by the industries dealing directly with tourists – including, for example, purchases of food and cleaning services by hotels, of fuel and catering services by airlines, and IT services by travel agents.

The 'induced' contribution measures the GDP and jobs supported by the spending of those who are directly or indirectly employed by the Travel & Tourism sector.

TRAVEL & TOURISM'S CONTRIBUTION TO GDP¹

The direct contribution of Travel & Tourism to GDP in 2024 was BRL294.0bn (2.5% of GDP). This primarily reflects the economic activity generated by industries such as hotels, travel agents, airlines and other passenger transportation services (excluding commuter services). But it also includes, for example, the activities of the restaurant and leisure industries directly supported by tourists.

The direct contribution of Travel & Tourism to GDP is expected to grow by 1.8% pa to BRL352.6bn (2.5% of GDP) from 2025 to 2035.

BRAZIL: DIRECT CONTRIBUTION OF TRAVEL & TOURISM TO GDP

Constant 2024 BRL BN

% of whole Economy GDP

The total contribution of Travel & Tourism to GDP (including wider effects from investment, the supply chain and induced income impacts, see page 3) was BRL899.9bn in 2024 (7.7% of GDP).

It is forecast to rise by 1.7% pa to BRL1,072.4bn from 2025 to 2035 (7.6% of GDP).

BRAZIL: TOTAL CONTRIBUTION OF TRAVEL & TOURISM TO GDP

Constant 2024 BRL BN

% of whole Economy GDP

¹ All values are in constant 2024 prices & exchange rates
F - Forecast

TRAVEL & TOURISM'S CONTRIBUTION TO EMPLOYMENT

Travel & Tourism supported 2,286,603 jobs directly in 2024 (2.2% of total employment). This includes employment by hotels, travel agents, airlines and other passenger transportation services (excluding commuter services). It also includes, for example, the activities of the restaurant and leisure industries directly supported by tourists.

By 2035, Travel & Tourism will account for 2,799,959 jobs directly (2.7% of total employment), an increase of 1.8% pa from 2025.

BRAZIL: DIRECT CONTRIBUTION OF TRAVEL & TOURISM TO EMPLOYMENT

The total contribution of Travel & Tourism to employment (including wider effects from investment, the supply chain and induced income impacts, see page 3) was 8,051,517 jobs in 2024 (7.9% of total employment).

By 2035, Travel & Tourism is forecast to support 9,744,921 jobs (9.3% of total employment), an increase of 1.7% pa since 2025.

BRAZIL: TOTAL CONTRIBUTION OF TRAVEL & TOURISM TO EMPLOYMENT

F - Forecast

VISITOR EXPORTS AND INVESTMENT¹

VISITOR EXPORTS

Visitor exports are a key component of the direct contribution of Travel & Tourism. In 2024, Brazil generated BRL38.7bn in visitor exports.

By 2035, international tourist arrivals are forecast to total 9,679,000, generating expenditure of BRL54.5bn, an increase of 3.1% pa since 2025.

BRAZIL: VISITOR EXPORTS AND INTERNATIONAL TOURIST ARRIVALS

INVESTMENT

Travel & Tourism is expected to have attracted capital investment of BRL104.5bn in 2024.

Travel & Tourism's share of total national investment is expected to be 4.4% in 2035.

BRAZIL: CAPITAL INVESTMENT IN TRAVEL & TOURISM

¹ All values are in constant 2024 prices & exchange rates

F - Forecast

DIFFERENT COMPONENTS OF TRAVEL & TOURISM¹

Leisure travel spending (inbound and domestic) generated 89.9% of total internal spending in 2024 (BRL579.1bn) compared with 10.1% for business travel spending (BRL65.3bn).

Leisure travel spending is expected to rise by 1.7% pa to BRL690.4bn from 2025 to 2035.

Business travel spending is expected to rise by 2.0% pa to BRL83.8bn from 2025 to 2035.

Domestic travel spending generated 94.0% (BRL605.6bn) of total internal spending in 2024 compared with 6.0% (BRL38.7bn) for visitor exports (ie foreign visitor spending or international tourism receipts).

Domestic travel spending is expected to rise by 1.7% pa to BRL719.6bn from 2025 to 2035.

Visitor exports are expected to rise by 3.1% pa to BRL54.5bn from 2025 to 2035.

The Travel & Tourism sector contributes to GDP and employment in many ways as detailed on page 3.

The total contribution of Travel & Tourism to GDP is three times greater than its direct contribution.

The tables on pages 9-12 provide brief extracts from the full WTTC Economic League Table Rankings, highlighting comparisons with competing destinations as well as with the world and regional average. Averages are simple cross-economy averages. The competing destinations selected are those that offer a similar tourism product and compete for tourists from the same set of origin markets. These tend to be, but are not exclusively, geographical neighbours.

% of total refers to each indicator's share of the relevant whole economy indicator such as GDP and employment. Visitor exports is shown relative to total exports of goods and services. Domestic spending, as well as leisure and business spending, is expressed relative to whole economy GDP. Investment spending is expressed relative to whole economy investment.

GLOSSARY

KEY DEFINITIONS

TRAVEL & TOURISM

Relates to the activity of travellers on trips outside their usual environment with a duration of less than one year. Economic activity related to all aspects of such trips is measured within the research.

ECONOMIES

This term is used because the scope of the research covers not only countries but also specific territories/states.

DIRECT CONTRIBUTION TO GDP

GDP generated by industries that deal directly with tourists, including hotels, travel agents, airlines and other passenger transport services, as well as the activities of restaurant and leisure industries that deal directly with tourists. It is equivalent to total internal Travel & Tourism spending (see below) within an economy less the purchases made by those industries (including imports). In terms of the UN's Tourism Satellite Account methodology it is consistent with total GDP calculated in table 6 of the TSA: RMF 2008.

DIRECT CONTRIBUTION TO EMPLOYMENT

The number of direct jobs within Travel & Tourism. This is consistent with total employment calculated in table 7 of the TSA: RMF 2008.

TOTAL CONTRIBUTION TO GDP

GDP generated directly by the Travel & Tourism sector plus its indirect and induced impacts (see below).

TOTAL CONTRIBUTION TO EMPLOYMENT

The number of jobs generated directly in the Travel & Tourism sector plus the indirect and induced contributions (see below).

DIRECT SPENDING IMPACTS

VISITOR EXPORTS

Spending within the economy by international tourists for both business and leisure trips, including spending on transport, but excluding international spending on education. This is consistent with total inbound tourism expenditure in table 1 of the TSA: RMF 2008.

DOMESTIC TRAVEL & TOURISM SPENDING

Spending within an economy by that economy's residents for both business and leisure trips. Multi-use consumer durables are not included since they are not purchased solely for tourism purposes. This is consistent with total domestic tourism expenditure in table 2 of the TSA: RMF 2008. Outbound spending by residents abroad is not included here, but is separately identified according to the TSA: RMF 2008 (see below).

GOVERNMENT INDIVIDUAL SPENDING

Spending by government on Travel & Tourism services directly linked to visitors, such as cultural services (eg museums) or recreational services (eg national parks).

INTERNAL TOURISM CONSUMPTION

Total revenue generated within an economy by industries that deal directly with tourists including visitor exports, domestic spending and government individual spending. This does not include spending abroad by residents. This is consistent with total internal tourism expenditure in table 4 of the TSA: RMF 2008.

BUSINESS TRAVEL & TOURISM SPENDING

Spending on business travel within an economy by residents and international visitors.

LEISURE TRAVEL & TOURISM SPENDING

Spending on leisure travel within an economy by residents and international visitors.

INDIRECT AND INDUCED IMPACTS

INDIRECT CONTRIBUTION

The contribution to GDP and jobs of the following three factors:

- **CAPITAL INVESTMENT:** Includes capital investment spending by all industries directly involved in Travel & Tourism. This also constitutes investment spending by other industries on specific tourism assets such as new visitor accommodation and passenger transport equipment, as well as restaurants and leisure facilities for specific tourism use. This is consistent with total tourism gross fixed capital formation in table 8 of the TSA: RMF 2008.
- **GOVERNMENT COLLECTIVE SPENDING:** Government spending in support of general tourism activity. This can include national as well as regional and local government spending. For example, it includes tourism promotion, visitor information services, administrative services and other public services. This is consistent with total collective tourism consumption in table 9 of TSA: RMF 2008.
- **SUPPLY CHAIN EFFECTS:** Purchases of domestic goods and services directly by different industries within Travel & Tourism as inputs to their final tourism output.

INDUCED CONTRIBUTION

The broader contribution to GDP and employment of spending by those who are directly or indirectly employed by Travel & Tourism.

OTHER INDICATORS

OUTBOUND EXPENDITURE

Spending outside the economy by residents on all trips abroad. This is fully aligned with total outbound tourism expenditure in table 3 of the TSA: RMF 2008.

INTERNATIONAL TOURIST ARRIVALS

The number of arrivals of international overnight visitors (tourists) to the economy.

METHODOLOGICAL NOTE

WTTC has an ongoing commitment to align its economic impact research with the UN Statistics Division-approved 2008 Tourism Satellite Account: Recommended Methodological Framework (TSA:RMF 2008). This involves the benchmarking of our data to official, published TSAs, including for economies which are reporting data for the first time, as well as existing economies reporting an additional year's data. New TSAs incorporated this year include Argentina, Ethiopia, Romania and Türkiye bringing our total of economies in our benchmarking dataset to 76. Our TSA benchmarked economies cover around 90% of global direct T&T GDP.

WTTC coverage includes data and reports on 184 individual economies and 28 regions, sub-regions and economic and geographic groups.

ECONOMIC AND GEOGRAPHIC GROUPS

APEC (ASIA-PACIFIC ECONOMIC COOPERATION)

Australia, Brunei Darussalam, Canada, Chile, China, Hong Kong SAR China, Indonesia, Japan, South Korea, Malaysia, Mexico, New Zealand, Papua New Guinea, Peru, Philippines, Russia, Singapore, Taiwan China, Thailand, USA, Vietnam.

COMMONWEALTH¹

Anguilla, Antigua and Barbuda, Australia, Bahamas, Bangladesh, Barbados, Belize, Bermuda, Botswana, Brunei Darussalam, Cameroon, Canada, Cayman Islands, Cyprus, Dominica, Eswatini, Fiji, Gambia, Ghana, Grenada, Guyana, India, Jamaica, Kenya, Kiribati, Lesotho, Malawi, Malaysia, Maldives, Malta, Mauritius, Mozambique, Namibia, New Zealand, Nigeria, Pakistan, Papua New Guinea, Rwanda, Seychelles, Sierra Leone, Singapore, Solomon Islands, South Africa, Sri Lanka, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines, Tanzania, Togo, Tonga, Trinidad and Tobago, Uganda, UK, UK Virgin Islands, Vanuatu, Zambia.

G7

Canada, France, Germany, Italy, Japan, UK, USA.

G20

African Union, Argentina, Australia, Brazil, Canada, China, European Union, France², Germany², India, Indonesia, Italy², Japan, Mexico, Russia, Saudi Arabia, South Africa³, South Korea, Türkiye, UK, USA.

GCC (GULF COOPERATION COUNCIL)

Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, UAE.

OAS (ORGANIZATION OF AMERICAN STATES)

Antigua and Barbuda, Argentina, Bahamas, Barbados, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Dominica, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Panama, Paraguay, Peru, St Kitts and Nevis, St Lucia, St Vincent and the Grenadines, Suriname, Trinidad and Tobago, USA, Uruguay, Venezuela.

OECD (ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT)

Predicting Travellers' Impact

ForwardKeys is trusted by businesses worldwide to deliver actionable insights through unmatched travel data and innovative solutions. As a global leader in travel intelligence, ForwardKeys delivers real-time and predictive analysis of 4,750 airports, 900 airlines and 4.5 billion annual passengers, helping brands and retailers better understand and anticipate traveller behaviour.

ForwardKeys' proprietary algorithms, powered by advanced AI and machine learning, process millions of data points daily, offering unmatched granularity to inform strategic decisions in marketing, operations, and growth. Brands and retailers can gain hyper-targeted information about geographic areas, enabling more effective marketing, store placements, and strategic planning.

By leveraging detailed travel behaviour data across nationalities, routes, regions, and seasonality, ForwardKeys helps businesses focus their strategies, giving them a competitive edge and maximising growth opportunities.

The World Travel & Tourism Council is the global authority on the economic and social contribution of Travel & Tourism.

WTTC promotes sustainable growth for the Travel & Tourism sector, working with governments and international institutions to create jobs, to drive exports and to generate prosperity. Council Members are the Chairs, Presidents and Chief Executives of the world's leading private sector Travel & Tourism businesses.

Together with Oxford Economics, WTTC produces annual research that shows Travel & Tourism to be one of the world's largest sectors, supporting 357 million jobs and generating 10% of global GDP in 2024. Comprehensive reports quantify, compare and forecast the economic impact of Travel & Tourism on 184 economies around the world. In addition to individual country fact sheets, and fuller country reports, WTTC produces a world report highlighting global trends and 27 further reports that focus on regions, sub-regions and economic and geographic groups.
